SOFTWARE ENGINEER

Summary

Experienced Front End Developer with 3 years of experience in React, Node.js, and MongoDB. Specializing in designing and implementing scalable web applications for international clients, with a focus on enhancing user engagement and satisfaction. Proven ability to deliver high-quality solutions in collaborative team environments while continuously learning and adopting best practices in Front-end development.

Skills

• React Js | HTML | CSS | JavaScript | GitHub | Redux | PayPal API | JWT | Express | Node.js | MongoDB

Work Experience

Software Engineer	<u>Voylabs</u>	<i>Kochi, India</i>	2021 – Current
--------------------------	-----------------------	---------------------	-----------------------

Work Summary

- Developed scalable and responsive web applications using React for international (US) clients across various sectors, enhancing user engagement and satisfaction.
- Led the creation of reusable React components for campaign listings, user profiles, and admin dashboards, focusing on efficient state management and scalability using Redux.
- Collaborated with international teams to integrate various payment methods, including Stripe and PayPal, ensuring secure transactions across
- Optimized application performance through image compression and improved load times, resulting in an enhanced user experience.
- Implemented responsive front-end designs using React.js, Tailwind Css, Material UI. ensuring optimal user experience across various devices.

Project 01 - Charity and Crowd Funding (MERN Stack web Application)

- Developed a responsive, component-driven frontend using React, optimizing performance with Vite for faster builds.
- Created dynamic React components for campaign listings, user profiles, and donation pages, ensuring efficient state management.
- Integrated JWT for secure user session management and incorporated Stripe API for payment processing.
- Tech Stack used : React, Tailwind CSS, Ant Design, Stripe API, JWT, MongoDB, Node.js, Express.js

Project 02 - Proshop (MERN Stack Ecommerce Platform)

- Built a full-featured eCommerce platform using React with functional components and hooks, managing state efficiently.
- Implemented Redux Toolkit for global state management, enabling user authentication and order processing seamlessly.
- Integrated PayPal and credit card payment options, ensuring secure transactions and real-time updates in the shopping cart.
- Utilized Axios for efficient API calls, enhancing data fetching and state management across the application.
- Tech Stack: React, Redux Toolkit, MongoDB, Express.js, Node.js, JWT, PayPal API, React-Bootstrap

Project 03 - Movie Information Web Application

- Developed a responsive web application to display movie information using React and Tailwind CSS, enhancing user engagement.
- Integrated TMDB API to fetch dynamic movie data and implemented search functionality for user convenience.
- Ensured full responsiveness, optimizing user experience across desktop and mobile devices.

Education

**Bachelor of Technology -
Instrumentation and control**

**Nss College of
Engineering -
Palakkad**

Kerala, India

2020

Certification

- [The complete web development Bootcamp, Authorized by UDEMY](#)
